

NEW Workplace First Aid Kits Compliant With BS8599-1

Whatever your industry, PJD Safety Supplies supply the very highest quality products to meet the needs of the people working in the most demanding environments.

Choosing The Right First Aid Kit

Choosing the right first aid kit is now even easier.

Decide if your work environment is **LOW HAZARD** or **HIGH HAZARD** by reading the table (below).

Then how many employees there are in your workplace, and finally which of the three sizes of kit you will need, e.g. small, medium or large.

It's that simple!

You Have A Duty Of Care To Your Employees

The kits have been designed to be more user friendly. The contents are instantly visible and more secure, this in turn has helped to improve and simplify selection for employers and specifiers to meet their legal and moral obligations.

Category Of Hazard	Number Of Employees	Size Of First Aid Kits
LOW HAZARD e.g. shops, offices, libraries etc.	Less than 25 25 – 100 more than 100	Small Medium Large (1 per 100 employees)
HIGH HAZARD e.g. light engineering and assembly work, food processing, warehousing, extensive work with dangerous machinery or sharp instruments, construction, chemical manufacture etc.	Less than 5 5 – 25 more than 25	Small Medium Large (1 per 25 employees)

What's Different About Our BS8599-1 Work Place First Aid Kits

Our BS8599-1 workplace first aid kits now have wider clips for a more secure closure. Removable compartments, means we can be more flexible with the content location.

The box is made from a thicker, more robust plastic making it less prone to damage.

The most visible change is the new industrial strength, wall bracket. Once attached to the wall, the workplace first aid kit fits snugly into the bracket.

BS8599-1 First Aid Kit In A Premier Box

- Contents are neatly contained in compartments
- Items quick and easy to locate
- Content diagram on inside lid shows quantity and location of products
- Supplied with industrial strength wall bracket
- Shrink wrapped

Eye Treatment

A complete range of emergency eye wash is available to enable you to comply with the ACOP L74 Health & Safety (First Aid) Regulations. "Where mains tap water is not readily available for eye irrigation, at least a litre of sterile water or saline (0.9%) in sealed, disposable containers should be provided.

Once the seal has been broken, the containers should not be kept for re-use. The container should not be used after the expiry date.

Eye Wash

- Unlike other pods the new pods have a slim neck for greater accuracy, ensuring the water jet goes exactly where you want it.
- A topical, sterile eye wash solution, containing Sodium Chloride BP 0.9% w/v in purified water BP. No antimicrobial agent or other substance has been added.
- The product is sterile and pyrogen free.

Description	Pack	Code

Re-usable Hot / Cold Pack

- Ideal for use on a sports injury to help reduce the pain
- If a cold pack is used this will help to reduce the swelling, whereas if a hot pack is used this will assist in increasing circulation to the injured area

Description	Code
Steroplast hot / cold pack	DI9612-SGL

Instant Ice Packs

- Why you should choose Steroplast?
- Test results from using a device called a Brannan electronic min/max digital thermometer, measuring the temperature every 30 seconds, it was found that:
 1. Our ice pack cools far quicker than alternative brands
 2. Stays colder for longer which is important for faster healing

Description	Pack	Code
Instant ice pack	13cm x 15cm	DI9584-SGL

CPR Pocket Resuscitator

- One – way valve with membrane to prevent cross infection
- Supplied in a clamshell case

Description	Code
CPR pocket resuscitator	DI9598

Foil Blanket
